

Warming Sock Treatment

This treatment acts to reflexively increase circulation and decrease congestion in the upper respiratory passages, head, and throat. It has a sedating action and many patients report that they sleep much better during the treatment. This treatment is also effective for pain relief and increases the healing response during acute infections. Finally, it is a great treatment for increasing circulation to the feet.

Indications:

Sore throat or any inflammation or infection of the throat, neck pain, ear infections, headaches, migraines, nasal congestion, upper respiratory infections, coughs bronchitis, sinus infections, and to increase circulation to the feet.

Supplies:

1 pair white cotton socks
1 pair thick wool socks
Warm bath or warm foot bath

Directions:

- Take a pair of cotton socks and soak them completely with cold water. Be sure to wring the socks out thoroughly so they do not drip.
- Warm your feet first. This is very important as the treatment will not be as effective and could be harmful if your feet are not warmed first. Warming can be accomplished by soaking your feet in warm water for a few minutes or taking a warm bath.
- Place cold wet socks on feet. Cover with dry thick wool socks. Go directly to bed. Avoid getting chilled.
- Keep the socks on overnight. You will find that the wet cotton socks will be dry in the morning.
